Election/Restrictions

1. Claims 1, 16, and 19 are generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 14 and 15, directed to the species of Figure 7 is no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

REASONS FOR ALLOWANCE

2. Claims 1-27 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "a first lens system for converting an input beam into an output beam having a substantially eccentric cross section" as set forth in the claimed combination. Claims 2-15 and 26 are also allowable based upon their dependence on claim 1.

Claim 16 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "providing an elliptical beam to the linear variable optical filter for reducing the angular broadening" as set forth in the claimed combination. Claims 17 and 18 are also allowable based upon their dependence on claim 16.

Claim 19 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "a first lens system for receiving the input beam from the input port and for providing a substantially elliptical beam" as set forth in the claimed combination. Claims 20-25 and 27 are also allowable based upon their dependence on claim 19.

The prior art of record, Scobey et al and Welch teach a first lens system and linearly variable filters but do not teach that the first lens system converts an input beam into an output beam having a substantially eccentric cross section and there is no motivation or teaching to modify this difference as derived. Examiner found arguments on page 7, lines 4-11 of the applicant's response, dated 9 November 2004 persuasive as regards the lack of motivation to combine the Welch reference with Scobey et al.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alessandro V. Amari whose telephone number is (571) 272-2306. The examiner can normally be reached on Monday-Friday 8:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew Dunn can be reached on (571) 272-2312. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
